There are lots of bugs in this game and we need a way to report them so they can be fixed or can be added into a sticky post. There is not enough room to write here, too much! So what I am going to do is go over the bugs and glitches that are in Roblox, then I will tell you how we can get them fixed or changed.

The first game to have a massive economy was Weebly Pages where they implemented a currency which included things such as energy, the ability to teleport to different locations, and more. There were about 4 things that were the most expensive at the time: The North Pole Room and Casino, Room of the Dead and Old Africa, and The Technology Lab and City. [119] Weebly Pages later went on to become Pikazo. [120]

On May 16th, 2018, ROBLOX announced that they were updating their "Terms of Service" section of the website to disallow using custom models or code to explicitly gain any sort of advantage in-game. They also block users from uploading custom model and code files. [20]

People who need a lot of money for their personal game development or projects would not like free roaming because to get enough Robux in free roam would take so long. They avoid free roaming because they want to get things done.

On February 4th 2019, ROBLOX released some updates for their Studio 2.1. They stated that they would be making many fixes on their website to improve the experience and to make it more stable and bug-free. [95] On February 11th 2019, ROBLOX released "Studio 2.2" which was a major update which contained bug fixes and minor improvements. On February 12th 2019, ROBLOX released "Studio 2.3" which was another smaller update containing bug fixes and minor improvements. [96]
